Basketball Analytics Seasonal Intern - Washington Men’s Basketball

The Washington Men’s Basketball Program is looking for a current UW student studying in the field of statistics, data science or similar field to join our program for the 2018-19 season and support the team in analytical day to day operations and research.

The Program:
The Men’s Basketball team is entering their second season under the direction of Coach Mike Hopkins. The sports field has been revolutionized by the progression of analytics within teams and our program is looking for individuals to help support our efforts to achieve success as a team and program for our student athletes.

The Position:
We’re looking for an unpaid intern for the 2018-19 season (October-March). Our basketball analytics intern will benefit from the position by earning the opportunity to support the team during our games and practices. Interns will, as a result, have admission to our games during the 2018-19 season and coordinate their schedules to attend our weekly practices.

Requirements:
• Be a current full-time University of Washington student studying toward a degree in Data Science, Statistics or similar program.
• Be able to commit to attend practices and/or some late evenings on game days.

Responsibilities:
• Assist in the collection of basketball statistics during basketball events such as practices and games.
• Conduct research to support the efforts of scouting in the form of statistics-based reporting.
• Manage the input of data into relevant software for organization process such as Excel and an SQL server.
• Assist in the reporting of findings for use by the coaching staff for analysis of the team internally and of opponents prior to games.

Why Should You Apply?
• If you are interested in the field of Sports Analytics and looking for the opportunity to get involved.
• To develop your skills as a technical member of a support staff to convey your research and work in an understanding manner for non-technical stakeholders.
