Postdoctoral Fellow, Biostatistics  
Memorial Sloan Kettering Cancer Center

Memorial Sloan Kettering Cancer Center (MSK) is one of the world’s premier cancer centers, committed to exceptional patient care, leading-edge research, and superb educational programs. The blending of research with patient care is at the heart of everything we do. The institution is a comprehensive cancer center whose purposes are the treatment and control of cancer, the advancement of biomedical knowledge through laboratory and clinical research, and the training of scientists, physicians and other health care workers.

We are seeking a highly motivated candidate, interested in statistical and computational cancer genomics, for a position as a postdoctoral fellow. This position will focus on the integration of large-scale sequencing data sets from public (e.g., the Cancer Genome Atlas study and the International Cancer Genome Consortium study) and local resources to investigate somatic mutation patterns across cancer types.

The ideal candidate should have:

- PhD degree in biostatistics, statistics, bioinformatics, or a related field
- experience in NGS sequencing data analysis including whole-exomes and whole-genomes
- Solid methodological training in statistics, be comfortable working with large data sets, proficient in at least one of the statistical programming languages R/Matlab/Python and have experience working on Unix/Linux systems and basic shell scripting

Please send CV, a letter outlining your interest and names/contact information of three references via email to:
